

MedReach Memos

November 23, 2012

There is nothing we enjoy more than reaching out to our community. [MedReach](#) recently supported the Family Celebration Health Fair in Los Angeles. The two-day event provided health education including prenatal care, pediatrics, senior healthcare, and family planning. Free services ranged from Flu shots, health and dental screenings, to body fat measurements and eye exams.

We supported the event by performing blood pressure screenings. **Danny Hernandez** and **Calvin Centeno** ran the booth the first day (braving the rain we might add) and **Alex Guzman** and **Adam Levin** held it down the second day. Between both crews, we made contact with well over 100 folks educating our citizens on normal blood pressure ranges as well as lifestyle and hereditary risk factors. Danny and Alex, along with a couple of new additions to the [MedReach](#) team, Calvin and Adam, did a super job and were great representatives for the company.

Thanks for the support fellas!
