

MedReach

AMBULANCE SERVICE

A Los Angeles DHS-EMS approved ambulance service provider

ride-a-long PROGRAM

Seeing is believing! The MedReach Ambulance Service ride-a-long program allows Emergency Medical Technician school students to observe certified EMTs during their tour of duty in an ambulance vehicle. Students will see first hand how MedReach EMTs perform patient assessments, provide care for patients, operate equipment, and communicate with patients and health care facility staff. This invaluable public education program gives students a better understanding of emergency medical service operations and gain valuable insight into the services provided to MedReach customers. Participants in the ride-a-long program will experience the satisfaction in helping their neighbors during an emergency.

WHAT YOU NEED

- Current enrollment in a certified EMT training program
