Description of Services

MedReach is a full service medical transport company that provides industry leading Basic Life Support (BLS) services 24 hours a day, 7 days a week.

All medical personnel maintain current State and County required licenses, as well as up to date BLS, ACLS, and PALS certifications.

Health Plans

In addition to Medicare and Medi-Cal, MedReach works closely with various health maintenance organizations (HMO), workers compensation insurance providers, preferred provider organizations (PPO), and other health plans.

MedReach Ambulance is a local and woman owned business that has

provided emergency and non-emergency medical transportation services in the County and City of Los Angeles, including the City of Long Beach, South Bay, and surrounding areas for over 25 years. Our management team has a combined experience of over 100 years in the ambulance industry and understands the importance of providing excellent services to our patients and healthcare customers. What makes us the most comprehensive choice is our exceptional work ethic, which has earned us the reputation as being a leader in providing quality and innovative ambulance services.

Rapid response times in our industry are essential to our patients and customers. MedReach has developed an effective strategy, combining a vehicle-posting plan with the assistance of computer technology, to provide prompt and accurate estimated times of arrival (ETA). Our state-of-the-art Computer Aided Dispatch (CAD) system, which works in conjunction with satellite tracking through global positioning satellites (GPS) and automatic vehicle locators, ensures that all areas of our transport operations function at the highest standard.

MedReach Ambulance ensures that all vehicles and equipment exceeds the requirements of California Highway Patrol, California Vehicle Code, State of California EMS Authority, County and City of Los Angeles EMS Policy and Procedures, and California Administrative Codes (Title 13 and Title 22).

Our goal is to meet and exceed our customer's expectations through optimal patient care, compassion, and professionalism, to the highest standard, each and every time we are called upon.
